

BATTERY BOSS[®] WC

by **HAWKER[®]**

The Battery Boss[®] WC Control is a compact, wireless electronic device that attaches to the battery to provide real-time battery diagnostics.

Battery Boss[®] WC monitors the battery based on capacity, temperature, and state of charge — allowing the user to maximize battery performance and life.

The **Battery Boss[®] WC** maintains a 2,550 cycles or 36,000 data sets which can be downloaded quickly and simply with a PC or laptop. The data (stored in memory) is compiled and put into various reports for easy battery analysis.

The **Battery Boss[®] WC Control** is UL listed. **Battery Boss[®] WC** can also be ordered separately as a Battery Accessory and is available for batteries consisting of 12, 18, 24, 36, or 40 cells.

The Battery Boss[®] WC can also provide the following information:

- Monitors key battery parameters: voltage, current, and temperature.
- Also monitors health of the battery: electrolyte level and battery “balance.”
- Easy to install and setup.
- Can be used to track battery cycles or as a data logger.
- Able to transfer data wirelessly, up to 100-ft. away.
- LEDs provide instant battery fault inductions (overheated, low electrolyte, and out of balance).
- Passcode protection

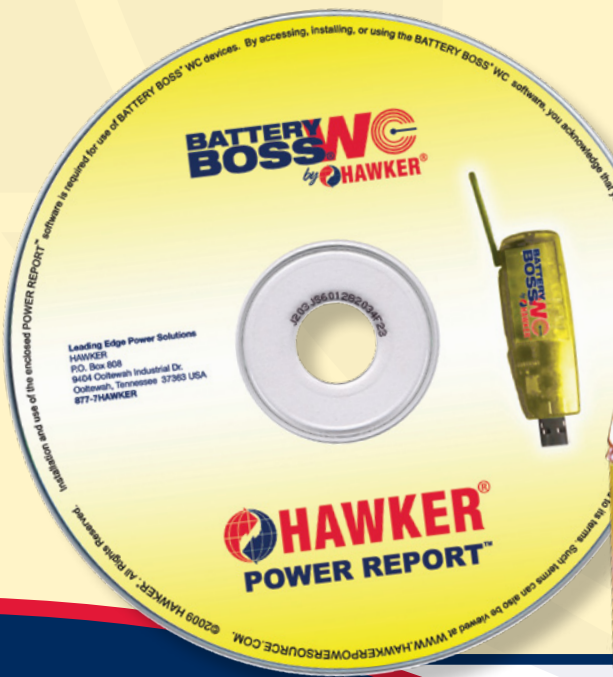

HAWKER[®]
Leading Edge Power Solutions

HAWKER® Power Report™ Software:

(to be used with the HAWKER® Battery Boss® WC)

- Windows®-based program for PC's and laptops
- Easy to install
- Easy to use
- Track whole fleets of batteries
- Reports battery faults and warnings, Ah and kW through put, cycle time and time of use, and more.
- Data can be exported to .csv files for use with MS Excel® or other applications.
- Comprehensive fleet and individual battery reports can be printed or saved to .pdf in many languages (including Spanish and French).
- Data for an entire fleet can be saved for data sharing and backup.
